Bathroom Vanity Tops, Basin Bowls & Bath Tubs

Mitchell Bink Concrete Design

Hello!

We are Mitch & Jess - the husband and wife team behind Mitchell Bink Concrete Design.

Firstly, we want to say thank you, thank you for taking the time to check out our business.

We began Mitchell Bink Concrete Design in 2013 whilst Mitch was working for his dad at Fyshwick Cement Products and whilst Jess was working full time for a company in Canberra. After many years of working with concrete, Mitch saw an opening for a new and innovative concrete product in Canberra.

Stepping out of his comfort zone and moving away from the family business, Mitch and Jess began Mitchell Bink Concrete Design.

Mitch - the brains, the hands, the ideas man, the go-getter.

Jess - Administration, Accounts, HR, Marketing, Social Media, Receptionist.

For those of you who watch Suits - we like to think we're Harvey Spector & Donna. Together, along with our team of artisans, we make a pretty good team.

Away from work and business, you will find us spending time renovating our home, spending time with our dogs, Zeus & Apollo, or spending quality time with family and friends.

Mitch will be mountain bike riding, watching footy, on the hunt for new walking trails, listening to podcasts or watching the latest documentaries on History or Science.

Jess will be at the Canberra Farmers Markets, going for walks whilst listening to podcasts, spending way too much time on Pinterest looking for healthy recipes, cooking or watching the latest Netflix documentary on health, food and the human body. Oh and the occasional reality tv show (as Mitch shakes his head in disgust haha).

We are so passionate about our business and what we do. Mitchell Bink Concrete Design is such a huge part of our life and a journey we hope to continue for many years to come.

We hope we have the opportunity to meet you, chat with you about our product and how it could work throughout your home or business.

Thanks again for checking out our business, we truly do appreciate the support.

Mitch & Jess x

FEATURES

When considering concrete as a bathroom feature, whether it be through a vanity top, a vanity top with integrated sinks, a basin bowl or bath tub, not all clients are aware of what is available and their options. Some of the features of these products include:

VANITY TOPS

- We can provide a vanity top as a benchtop surface by itself. Clients can purchase their own basin bowls to sit on top.

VANITY TOPS WITH INTEGRATED SINKS

- At Mitchell Bink Concrete Design, we have a range of single or double integrated sink designs available. In addition to our in-house designs, we can also custom make integrated sinks.

OTHER VANITY TOP FEATURES

- Concrete vanity tops can be used throughout the home, your powder room, bathroom and ensuite.
- In terms of pricing, thickness doesn't effect our pricing much at all. We have three pricing brackets, the first being 20mm-25mm, the second being 30mm-80mm and the third being 90mm+. Whether your vanity tops are 40mm thick or 80mm thick, this thickness will not impact your Quote. A lot of other vanity top alternatives can almost double in price when adding thickness, this is not the case for us.
- Our vanity tops can sit on joinery or they can also be made to appear floating.
- When looking at other custom made vanity top alternatives, more often than not, you are purchasing a sheet of material, whether you use the whole sheet or not for your vanity top, you pay for the whole sheet and often there is wastage that you pay for. As everything we do is custom and hand made, there is no wastage. You only pay for exactly what you need. Your vanity top material is weighed out to the gram so there is no wastage.
- As our vanity tops are completely custom and hand made, we have a lot of flexibility when it comes to size and design. We are certainly not restricted and limited in what we can do.
- Our vanity tops can be made in any colour.

BASIN BOWLS

- At Mitchell Bink Concrete Design, we offer a set range of basin bowl designs. Round, Oval and Rectangular in shape. These basin bowls start from \$695 each and are available in any colour.

BATH TUBS

- At Mitchell Bink Concrete Design, we offer three different sized freestanding concrete bathtubs. Pricing starts from \$4900, for more information about our bath tubs just get in touch with us.

OUR PROCESS

STEP 1: Email us a copy of your plans or a drawing of your proposed design/layout. It is best for this to include the length, width and preferred thickness of each piece. From here, we will be able to send you an initial Quote to give you an indication of price. Also include your address for delivery and installation, including any information we may need to know about access (stairs, steep driveway, narrow entrance etc).

STEP 2: If the initial Quote is something you may be interested in, we would recommend you make an appointment to come in and see us. During your appointment, we can discuss the project further, discuss the product, check out colours and finishes and other projects we are currently working on.

STEP 3: If you decide to proceed, it's best you keep us in the loop in terms of timeframe so we can keep the project in our pipeline and temporarily book in a final measure and site visit (if required).

STEP 4: Mitchell will come and complete a final site measure once your cabinetry has been installed. If there is no cabinetry, Mitchell may still need to complete a site check, this is determined on a case-by-case basis.

STEP 5: Once final measurements have been taken or confirmed and we have all of the required information for the project (like colour, sink location etc), we are ready to get started.

STEP 6: We will make the formwork for the project, cast the project, process it and seal it. For this stage, we will need at least 7-10 days for this process. This process will take longer if there is a custom integrated sink.

STEP 7: We will keep in touch during this process and once sealing is underway, we will be in touch to arrange a day and time for delivery and installation. Depending on the current workload at the time, we usually ask our clients to allow 3-5 weeks from final measure to installation, however, as I mention above we only need 7-10 days to create your project.

STEP 8: We are ready for installation. As for you, sit back, relax, and admire!

C O L O U R S & F I N I S H E S

At Mitchell Bink Concrete Design we offer a range of colours and finishes to our clients.

Our specialised mix starts with pure white cement, we then add black or coloured oxide to achieve different shades and colours. We offer a set range of colours (image 1-10 below) however any colour can be achieved through a custom sample process (if required). All grey colours can have a warm (image 9 & 10 below) or cool (image 1-8 below) tone.

Most projects are white, grey or black, but we certainly offer colours like pink, blue and green to name a few. At Mitchell Bink Concrete Design, we offer three different Finishes:

CREAM FINISH: This Finish is created by using a spraying technique. It is clean and crisp with slight texture.

MB SIGNATURE RANGE: This Finish is achieved by hand pressing concrete into our formwork. This Finish provides more movement and texture. This Finish can be achieved in any of the colours below.

TROWELED FINISH: This Finish is used for projects like stair treads and landings. It is hand troweled to give a raw textured look. This Finish is only used for certain projects.

1. PABLO WHITE

2. CREAM

3. SILVER FOX

4. GREY GOOSE

5. RAINMAKER

6. SMOKEY

7. NIGHT FALL

8. CARBON

9. SIMPLY TAUPE

10. CAFE GREY

11. SIGNATURE RANGE

12. TROWELED FINISH
